

# Autodesk Revit Architecture 2010 Essentials

## Course Details:

- Course Duration:** 3 days  
**Cost:** €795.00 per person  
**Award:** Autodesk Official Certificate in Autodesk Revit Architecture Essentials

## Course Description

Students use Revit® Architecture 2010 to learn about building information modeling and the tools for parametric building design and documentation. Students begin the three-day course by learning the fundamental features of Revit Architecture 2010, and then progressing through schematic design and construction documentation, before finishing with design visualization. Students should be able to complete their first Revit Architecture project after completing this course.

This courseware offers both imperial and metric hands-on exercises representing real-world design scenarios.

## Objectives

The primary objective of this courseware is to teach students the concepts of building information modeling and introduce the tools for parametric building design and documentation using Revit Architecture 2010.

After completing this course, students will be able to:

- Describe the benefits of building information modeling.
- Use the fundamental features of Revit Architecture 2010.
- Use the parametric 3D design tools to design projects.
- Create detailing and drafting views.
- Create construction documentation.
- Use the presentation tools for design visualization.

## Who Should Attend

Architects, Architectural Technicians & Engineers who want to learn about building information modeling, working in 3D & using design visualisation.

## Prerequisites

No previous CAD experience is necessary. However, before using this courseware, the student should have a working knowledge of the following:

- Architectural design, drafting, or engineering principles.
- Microsoft® Windows® Vista, XP or 2000

## Why choose Amicus Technology Training?

- Quality certification - We are an authorized Autodesk, Bentley & City & Guilds training and exam centre
- Personal Attention ensured - Maximum 8 candidates per class
- Follow-on telephone support included in all courses
- We provide a range of courses to facilitate the candidate moving from an introductory level to advanced AutoCAD or specialist areas e.g. Architecture, Civil Engineering.
- We are constantly updating our courses to enable the candidate to avail of the latest software
- The West of Ireland's only Architecture, Civil Engineering & GIS authorized Autodesk reseller
